

## Description of the multiplayer event of DIGILOG project

Multiplayer event of the project was within the frame of International Conference “Research and Technology – Step into the Future (RaTSiF-2021)” (<http://ratsif2021s.tsi.lv/>).

The purpose of the International Conference “Research and Technology – Step into the Future (RaTSiF-2021)” is to bring together researchers, businessmen, students, governmental and municipality representatives on the basis of mutual multidisciplinary scientific, education and innovation interests for obtaining breakthrough results of solution of tasks that are existing currently and will appear in the future.

Agenda of the Conference includes Plenary presentations of the Latvian and foreign researchers, and presentations of participants within the framework of sessions.

The RaT-SiF Conference is event that provides a unique forum for people to present their researches and to collaborate with their peers. All participant in technical, economic and social research are invited to present a scientific talk describing their work. During the conference, each participant has an opportunity to find associates, strengthen lasting personal and professional relationships, to develop and improve their communication skills and to gain valuable experience in the environment of a scientific conference.

During the Conference Science Day and multiplayer events of different projects also take place.

There are plenary session and three pillars at the Conference RaTSiF-2021:

- Computer problems of the information society
- Innovations and smart technologies in transport and logistics
- Market: research, projects, technologies and problems of the modern economy

The programme of the Conference is available on the conference website ([http://ratsif2021s.tsi.lv/wp-content/uploads/sites/16/2019/01/RaTSiF\\_2021\\_April\\_programme\\_final.pdf](http://ratsif2021s.tsi.lv/wp-content/uploads/sites/16/2019/01/RaTSiF_2021_April_programme_final.pdf)).

An overview of the project, its description and main results were presented in a speech of Professor Igor Kabashkin at the plenary section of the conference. After the speech, questions were asked and the topic was discussed.
